CAREER OBJECTIVE

B.Tech Computer Science graduate (CGPA 8.69) from SR University, Warangal with hands-on Python and Flask microservice development experience through LifeRoute - a production application with REST APIs and real-time monitoring for incident detection. Comfortable working with relational databases and troubleshooting live application issues through log analysis. AWS Academy certified with CloudWatch monitoring experience directly relevant to production issue monitoring. Flexible and available for night shift work. Seeking Python Development Intern (Night Shift, WFH) role at SaaSBanana Technologies to support live production systems and contribute to feature development and bug fixes.

TECHNICAL SKILLS

Python Microservices: Python, Flask, Django concepts - developing and debugging backend microservices
Production Support: Issue monitoring, bug fixes, log analysis - hands-on with CloudWatch-based monitoring
Databases: MySQL (production experience), PostgreSQL concepts - data storage and optimisation
REST APIs: Building, testing, and maintaining REST APIs for live production applications
Remote Collaboration: Working independently and asynchronously with a remote development team
Monitoring & Troubleshooting: Real-time application health monitoring, incident detection, root cause analysis
Availability: Comfortable with night shift and flexible working hours for production support coverage
Cloud & Scripting: AWS (EC2, CloudWatch), Python and Bash scripting for automation

PROJECTS

LifeRoute - Production Python Microservices with Live Monitoring

Python | Flask | MySQL | AWS EC2 | CloudWatch | REST API | 2025

- Developed and debugged Python/Flask microservices handling real-time ambulance dispatch and hospital alert workflows in a production-style deployment on AWS EC2.
- Worked with MySQL database for data storage and optimisation, managing concurrent read/write operations under simulated production load.
- Built, tested, and maintained REST APIs supporting live application functionality - request handling, validation, and structured JSON responses.
- Set up CloudWatch monitoring for issue detection: tracked API error rates, response times, and system health, replicating production incident monitoring workflows.
- Performed log analysis to identify and resolve real-time application issues - connection failures, timeout errors, and unexpected exceptions.
- Practiced independent, self-directed development and troubleshooting - relevant to remote, asynchronous production support work.

Medical Appointment Booking System

PHP | MySQL | Git | 2024

- Built and maintained full-stack application with ongoing bug fixes and feature updates based on testing feedback.

EDUCATION

B.Tech - Computer Science Engineering | CGPA: 8.69

SR University, Warangal, Telangana | 2022 - 2026

Diploma - Computer Engineering | 79%

VMR Polytechnic, Warangal | 2019 - 2022

CERTIFICATIONS

- AWS Academy Cloud Foundations - Amazon Web Services
- AWS Academy Web App Builder - Amazon Web Services
- AWS Academy Data Pipeline Builder - Amazon Web Services
- CCNAv7 Introduction to Networks - Cisco Networking Academy
- Cybersecurity Essentials - Cisco Networking Academy
